

Knowledge. Experience. Support. Quality.

We’ve got the knowledge and experience to serve you better

At CPE Machinery we understand concrete pumping. We’re the company & equipment behind Australia’s largest projects, with more experience pumping and supporting concrete pumping machinery than any other supplier in Australia.

We’ve been on the end of the hose, understand the challenges on site, have proven results providing complete solutions for complex large scale projects, and are committed to ongoing training & development.

You can count on CPE Machinery to help your business deliver.

Our brands set the benchmark in quality, reliability & performance

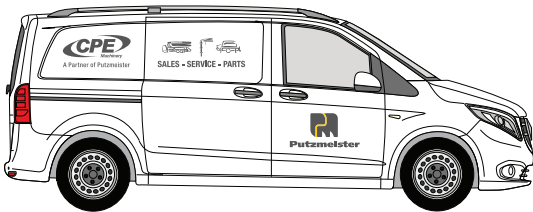

Put simply - we sell the machines that others try to copy. Putzmeister is internationally renowned for innovation, quality and reliability, with a time-tested reputation for excellence. The same goes for the parts and accessories brands we sell. We keep you running, with genuine Putzmeister parts and best quality, proven pipeline, hose and accessories brands that you can trust to help you perform better.

We’re focused on providing the highest level of customer support

We’re making continual improvements to increase our customer support to ensure we keep you running, with expert service and minimal downtime. The opening of our new purpose built, service centre, workshop, and training facility in Melbourne, and the addition of new experienced technicians, allows for a dramatic increase in customer support for repairs (both electric, hydraulic and mechanical), testing, mounting new machines on locally sourced chassis, training, as well as conducting Putzmeister certified boom inspections and performing placing boom rebuilds and certification. Our facility is large enough to accommodate 16 concrete pumps at once and allows for a 36m tower boom to be set up free standing inside! We also now have full time support on the road ready to service you in Sydney.

Now offering mobile support in Sydney ►

Our Melbourne Service Centre & Workshop just got bigger and better
